

Yunfei Luo

Ph.D. Student in the Halicioğlu Data Science Institute at the University of California San Diego

☎ (413) 404 2124 @ yul268@ucsd.edu 📍 San Diego, CA
🔗 yunfeiluo.github.io in linkedin.com/in/yunfei-luo 🐙 github.com/yunfeiluo

Research Interests

General AI/ML, Digital Health, Signal Processing, Multimodal Learning, Multitask Learning, Foundation Model, Reinforcement Learning

Specific Yunfei's research focuses on machine learning in the field of digital health, signal processing, multimodal modeling, and multitask learning. He aims to develop a robust and well-generalized methodology that enhances intelligent monitoring, supports timely interventions, and is deployable on edge devices.

Applications Mental Health, Substance Usage, Kidney Dialysis, Digital Health Monitoring

Education

- 09.2023 - present **Ph.D. Student in the Halicioğlu Data Science Institute**
University of California, San Diego, CA
‣ Advisor : 📧 Tauhidur Rahman
‣ Research : Machine Learning, Multimodal Learning, Multitask Learning, Digital Health
- 09.2021 - 05.2023 **Master of Science in Computer Science**
University of Massachusetts Amherst, Amherst, MA
‣ Advisor : Ina Fiterau Brostean | 📧 Information Fusion Lab
‣ Courses Taken : Advanced Machine Learning, Neural Networks, Probabilistic Graphical Models, Reinforcement Learning, Advanced Natural Language Processing, Advanced IoT
- 09.2017 - 05.2021 **Bachelor of Science in Computer Science | Bachelor of Science in Mathematics**
University of Massachusetts Amherst, Amherst, MA
‣ Machine Learning and Computing Specializations

Fellowships, Scholarships, Awards, and Honors

- 2023 - 2024 • Institute Fellowship | Halicioğlu Data Science Institute, UCSD
- 2021 - 2023 • Bay State Fellowship | Full Tuition Scholarship
- 2017 - 2021 • Outstanding Undergrad Course Assistant Award, College of Information & Computer Sciences, UMass
• Chancellor's Award, UMass Amherst

Teaching Experience

- 09.2021 to 06.2023** **Graduate Teaching Assistant, CICS, UMass Amherst**
‣ CS 311 Introduction to Algorithm in Fall 2021 and Spring 2023
‣ CS 590OP Applied Numerical Optimization, and CS 108 Foundation of Data Science in Fall 2022
‣ CS 220 Programming Methodology in Spring 2022
‣ Held office hours, led weekly discussion sessions, graded course works, answered questions on course forum, attended weekly TA meeting for discussing the progress/improvements of the course
Javascript Algorithms Numerical Optimization Data Science Teaching
- 01.2020 to 06.2021** **Undergraduate Course Assistant, CICS, UMass Amherst**
‣ CS 240 Reasoning under Uncertainty in Spring 2021, CS 311 Introduction to Algorithms in Fall 2020, CS 220 Programming Methodology in Spring 2020
‣ Helped with weekly discussion session, graded course works, and answered questions on Piazza
Javascript Algorithms Probability Teaching

Professional Experience

present to 06.2023	Graduate Student Researcher , MOSAIC Lab, UCSD ➤ Research focus on machine learning in signal processing and digital healthcare. Detailed works are presented in the <i>Publications</i> section. Research and DevelopmentMachine LearningDigital HealthcareSignal ProcessingNatural Language Processing
03.2023 to 03.2024	Machine Learning Scientist, Co-Founder , ONTO, integrated into Simplicity AI in 03.2024, Startup ➤ Designed and developed a comprehensive framework for creating customizable virtual AI characters, incorporating key architectural components such as memory management, contextual awareness, prompt optimization, tone/style transformation, and robust jail-break defense mechanisms. ➤ Researched and implemented a Retrieval-Augmented Generation (RAG) framework to enhance the realism and fidelity of virtual AI characters. ➤ Conducted rigorous testing to evaluate character robustness against jail-break attacks, identifying vulnerabilities and iteratively improving the framework's defense strategies. ➤ Collaborated with core team members through regular meetings to align on progress, address challenges, and strategize future directions for the company. Natural Language ProcessingLarge Language ModelVirtual CharacterInformation RetrievalSearch EngineMachine LearningResearch and Development
06.2022 to 06.2023	Machine Learning Engineering Intern , Center for Data Science, UMass Amherst ➤ Developed platform for Building Segmentation and Damage Assessment based on Satellite Imagery ➤ Integrated the Machine Learning pipeline along with User Interface for Imagery Fetching and Labelling ➤ Conducted Research and Experiments with various Finetuning setting and Machine Learning techniques to support selections of final-deployed hyper-parameters and models ➤ Delivered a presentation of the project to the Red Cross (funder and client), resulting in exceptional satisfaction and securing an additional year of funding for the initiative ➤ Worked as Research Assistant after internship Computer VisionMachine LearningDisaster ResponseSoftware DevelopmentFull-Stack Development
06.2020 to 06.2021	Data Engineering Intern , Institute for Applied Life Sciences, UMass Amherst ➤ Built pipelines for fMRI data preprocessing and statistical analysis ➤ Conducted Research and Experiments with Machine Learning models for Stroke Detection : Autoencoders, CNNs, and GANs ➤ Worked as Undergraduate Research Assistant after internship Machine LearningfMRIData Preparation

Publications

2026 Published	Personalized entropy-informed deep learning for identifying opioid misuse, <u>Nature Mental Health</u>, Journal Yunfei Luo , Iman Deznabi, Bhanu Gullapalli, Mark Tuomenoksa, Eric Garland, Madalina Fiterau, Tauhidur Rahman ➤ Leveraging transformer based time series model and dynamic branching to predict the stress, pain, and craving of Opioid users based on heart beat data collected from wearable sensor. ➤ Leveraging topological features from trajectory of inferential affective states across days and natural language processing technique to predict the risk of having opioid misuse behavior. Signal ProcessingNatural Language ProcessingHeart Rate VariabilityAffective StatesOpioidClinical TreatmentMachine LearningMultimodal FusionDigital Health
-------------------	--

2026	Toward Foundation Model for Multivariate Wearable Sensing of Physiological Signals, ACM Computing for Healthcare (ACM HEALTH), Journal
Under Revision	Yunfei Luo, Yuliang Chen, Asif Salekin, Tauhidur Rahman ➢ Developed NormWear, a foundational model for wearable sensing physiological signals, achieving state-of-the-art performance across 18 healthcare applications spanning 11 public datasets by leveraging generalizable and informative representations. ➢ Proposed a novel representation-alignment framework that aligns physiological and text embeddings, enabling zero-shot inference for previously unseen health applications in wearable sensing. ➢ Conducted comprehensive nonlinear dynamic analysis of intermediate model representations, offering quantifiable insights into internal processes and fostering trust in healthcare-related inferences. Signal Processing Foundation Model Natural Language Processing Machine Learning Neural Networks Digital Health
2026	Real Time Intradialytic Hypotension Forecasting Leveraging Modern Deep Learning Methods with Multimodal Fusion of Physiological Data and Electronic Health Records, npj Digital Medicine, Journal
Under Revision	Yunfei Luo, Siwei Zhao, Subhasis Dasgupta, Joseph M Mahaffy, Peter Kotanko, Tauhidur Rahman (Equal Senior Author), Rakesh Malhotra (Equal Senior Author) ➢ Novel multimodal modeling on physiological data, dialysis machine parameter, and electronic health records. Aiming to accurately forecasting hypotension 1 hour ahead in dialysis patient, and to provide comprehensive insights to nurse for intervention recommendation. Signal Processing Nephrology Clinical Treatment Machine Learning Multimodal Fusion Digital Health
2026	Automated Dysphagia Screening Using Noninvasive Neck Acoustic Sensing, IEEE International Conference on Acoustics, Speech, and Signal Processing (ICASSP), Conference
Published	Jade Chng, Rong Xing (Co-1st Author), Yunfei Luo (Co-1st Author), Kristen Linnemeyer-Risser, Tauhidur Rahman, Andrew Yousef, Philip A Weissbrod ➢ We present a noninvasive, acoustic-based machine learning framework that detects dysphagia with high accuracy, offering a scalable tool for monitoring pharyngeal health. Signal Processing Acoustic Signal Data Collection Clinical Treatment Applied Machine Learning Digital Health
2025	Sounding out Dysphagia : Using a Digital Stethoscope to Assess Audiometric Differences in Swallowing, The Laryngoscope, Journal
Published	Andrew Yousef, Sacha Moufarrej, David Zeng, Bao Luu, Rong Xing, James S. Crook, Yunfei Luo, Kristen Linnemeyer-Risser, Tauhidur Rahman, Philip A Weissbrod ➢ We demonstrated that digital stethoscope-based audiometric analysis can objectively distinguish normal and dysfunctional swallows during FEES. ➢ We identified key acoustic biomarkers, including duration, amplitude, and frequency, that correlate with swallow dysfunction severity, enhancing clinical evaluation accuracy. Signal Processing Digital Health Dysphagia Acoustics Non-invasive
2025	Opioid Misuse Detection from Cognitive and Physiological Data with Temporal Fusion Deep Learning, Drug and Alcohol Dependence, Journal
Published	Bhanu Gullapalli, Yunfei Luo, Tauhidur Rahman, Eric L. Garland ➢ We used deep learning to detect opioid misuse from cognitive and physiological data. ➢ Behavioral responses were stronger predictors of misuse than physiological signals. ➢ Our model accurately detected opioid misuse. Signal Processing Machine Learning Digital Health Addiction Psychophysiology Chronic Pain
2024	Start Simple : Progressive Difficulty Multitask Learning, The Nations of the Americas Chapter of the Association for Computational Linguistics (NAACL) 2024 SRW Proceedings, Conference
Published	Yunfei Luo, Yuyang Liu, Rukai Cai, Tauhidur Rahman ➢ Introducing sub-tasks with progressive difficulties to improve the performance on main task. Inspired by how people learn. Experimented on text classification, sentiment analysis, and argument mining Natural Language Processing Multi-task Learning Machine Learning Neural Networks

2024	Dynamic Clustering via Branched Deep Learning Enhances Personalization of Stress Prediction from Mobile Sensor Data, <i>Nature Scientific Report, Journal</i>
Published	Yunfei Luo, Iman Deznabi, Abhinav Shaw, Tauhidur Rahman, Madalina Fiterau Brostean > Proposed a novel approach to modeling the Multimodal data, got results that outperform SOTA > Modeled personalized and populational characteristics with Multitask Learning and Dynamic Clustering Method respectively > Evaluated the performance under cold-start setting, to support the robustness of our method Multi-modal Fusion Methods Mental Health Machine Learning Neural Networks Time Series
2023	Agent Performing Autonomous Stock Trading under Good and Bad Situations, <i>AI for Agent-Based Modelling (AI4ABM) in International Conference on Learning Representations (ICLR) 2023, Workshop</i>
Published	Yunfei Luo, Zhangqi Duan > Researched and experimented with different reinforcement learning algorithms to train agents to perform stock trading. The methods are evaluated under scenarios with stable and non-stable market Reinforcement Learning Machine Learning Neural Networks

Patents

2025	US2025/016369 - System and Method for Personalized Closed-Loop Opioid Addiction Management with Mobile and Wearable Sensing of Administrations, Affective States, and Misuse Risk Scores (Full US Utility patent application filed on Feb 18, 2025)
------	--

Talks

2026	• “Toward Foundation Model for Multivariate Wearable Sensing of Physiological Signals”, Lightning Talk at Conference of Naval Applications of Machine Learning (NAML), March 2nd
2025	• “Foundation Model for Multivariate Wearable Sensing of Physiological Signals”, Google Research Journal Club, May 27th • “Health AI, foundation models, agents, and related research”, Dexcom Journal Club, April 18th
2023	• “Integrating Machine Learning Models to Your Applications”, Workshop at SackHacks V, November

Professional Services

Reviewer	• International Conference on Learning Representations (ICLR), 2026 > Main Track 2026 > Workshop on Time Series in the Age of Large Models, International Conference on Learning Representations (TSALM), 2026 > Workshop on AI with Recursive Self-Improvement (RSI), 2026 • International Conference on Machine Learning (ICML), 2025, 2026 > Main Track 2026 > Workshop on Foundation Models for Structured Data, International Conference on Machine Learning (FMSD), 2025 • Conference on Computational Natural Language Learning (CoNLL), 2024, 2025, 2026 • Proceedings of ACM on Interactive, Mobile, Wearable and Ubiquitous Technologies (IMWUT), 2024, 2025
